

Trust-Check Worksheet

(v1 draft - rewrite these six questions for your own subject)

1. What is the AI actually measuring, in plain language?
2. What does its confidence score really represent - and what does it NOT represent?
3. Where does the ground truth come from, and how would you check it by hand?
4. What kind of input would you expect this AI to get wrong?
5. What's the cost of a false positive vs. a false negative here?
6. If a student disagreed with the AI, what would settle it?
